

Scene Double

For the last nine years PSL has been the supplier of the total order book for Scene Double Limited, a manufacturer of KVM and USB/Audio Extenders based in Borehamwood.

During that time we have assisted Scene Double in reaching a production level that sees in excess of 500 units per week leave PSL destined for locations in the UK, Europe and the United States.

Because of the wide customer base that Scene Double has attracted with its high quality low cost products control of the logistical supply for, what can be a volatile market, has presented the management at PSL with particular opportunities for innovation.

Scene double has a product range of approximately 170 part numbers and to keep a continuous supply flowing with an order window of two weeks has become a major logistical activity.

PSL has control of all aspects of the material pipeline covering:-

- **Metalwork**
- **Packaging**
- **Cables**
- **PCBs**
- **Electronic components**
- **Support documentation**

This coupled with a total manufacturing solution covering build, test and unit assembly has enabled Scene double to become one of the major forces in the extender marketplace.

The close working relationships that have evolved between Scene Double and PSL management has enabled a market penetration that would have otherwise not been achievable.
